

RAPID CRM

The RJT Compuquest rapid CRM implementation utilizing SAP CRM 2007 is a pre-configured implementation service that connects to your SAP system or as a stand-alone solution and replicates your business partners, contacts, and organizational structures. Benefit from a quick and pre-defined implementation to give you a faster time to value with lower risk.

RJT's rapid CRM implementation will include the four core business scenarios of lean campaign management, lead management, account and contact management, and activity management.
